

GEORGIA'S Missing Girls

If the family were to have **ONLY ONE CHILD,**

46%
of Georgians would prefer a boy

against

9%
who would opt for a girl

However

If relying on biological odds alone,

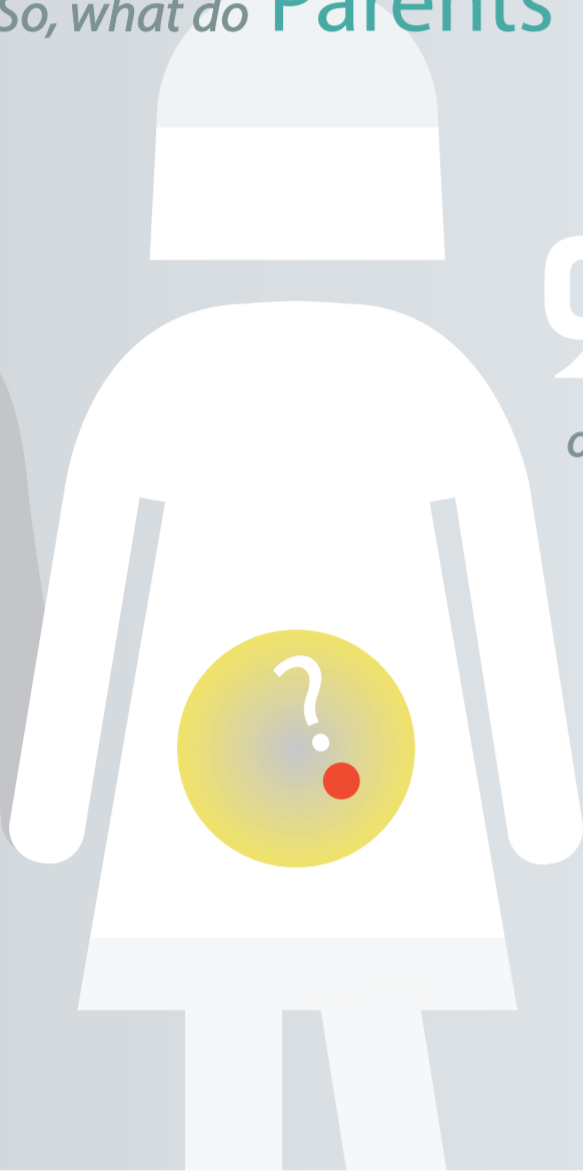

30%
of couples in Georgia would not produce a boy

with an average fertility of 1.7 children (2010)

CRRC, 2010

So, what do **Parents DO?**

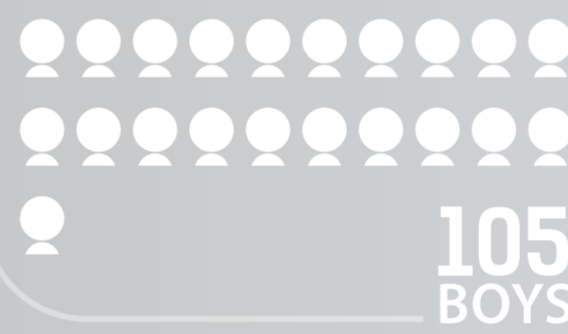

9%
of women living in a union say that they have had an abortion for the sole purpose of prenatal sex selection

UNFPA, 2013

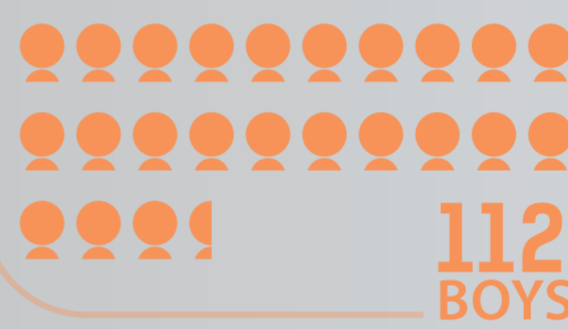

SEX RATIO

Sex ratio at birth provides the evidence that the prenatal **SEX SELECTION EXISTS** in Georgia

Norm

Georgia (2008-2012)

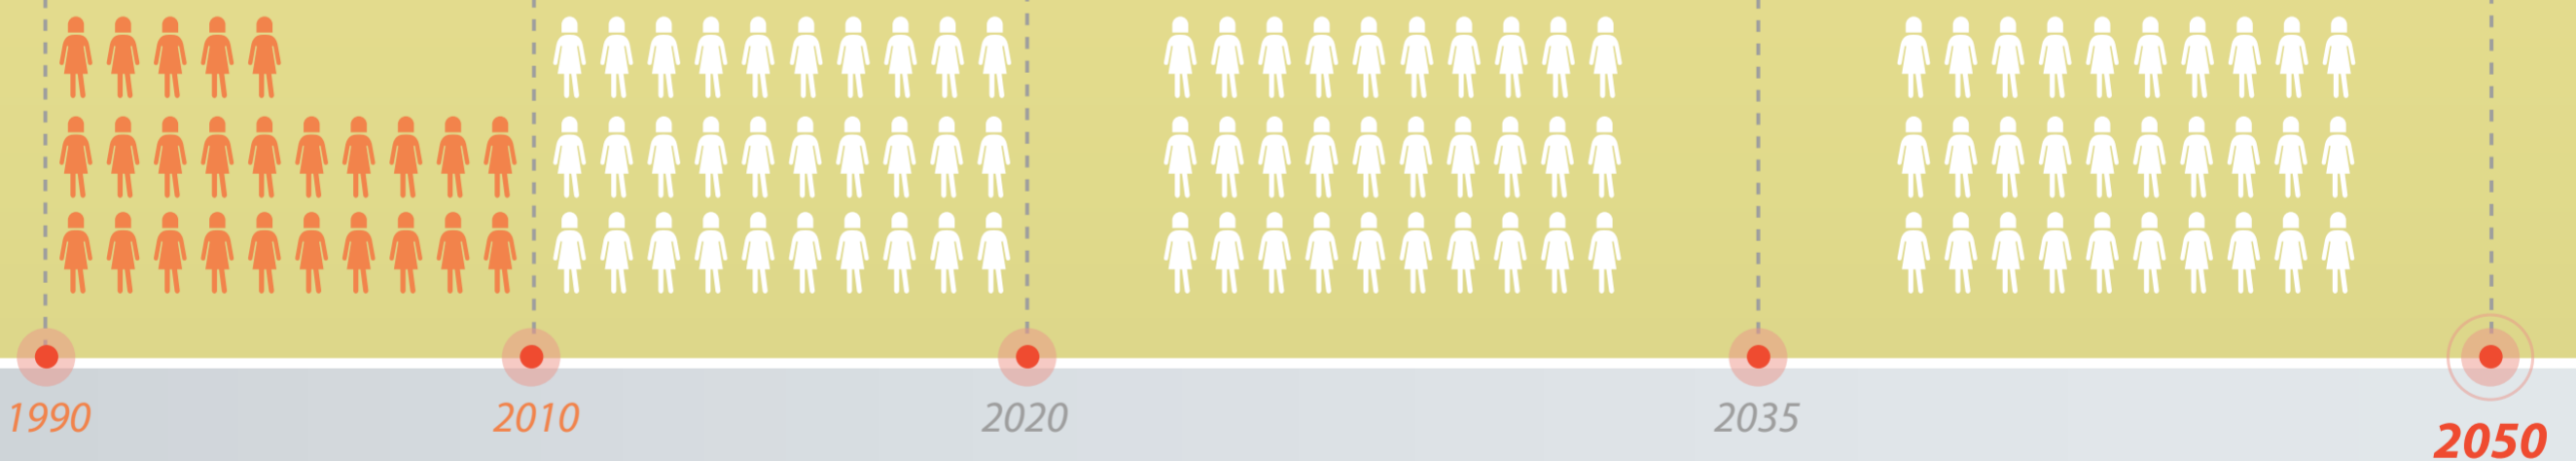

As a **RESULT**

25,000 girls went missing in Georgia

With the current trend, the total number of missing women will increase to **40,000** by

60,000 by

80,000 by

YOUR DENIAL DOES NOT MAKE GENDER-BIASED SEX SELECTION IN GEORGIA DISAPPEAR

RECOGNIZE THE PROBLEM, ACT TO SOLVE IT!

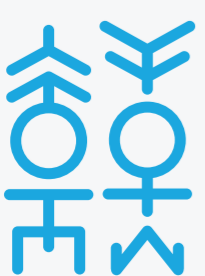

By that time

the number of these missing women should amount to almost

4% of the overall female population in the country

Which will also **Reduce** **CHILDBIRTH**

Enhancing Gender Equality in Georgia
